(54) VIDEO TAPE RECORDER

(57) Abstract

PURPOSE: To display an optimum program title for retrieving a program desired to watch out of many recorded programs and also to improve efficiency for using a cassette tape by storing automatically program information relating to recorded contents of plural videotaped cassette tapes by a VTR.

CONSTITUTION: When a reserved program is started to record, a title of the program is taken out from a teletext broadcasting decoder 8, cassette discriminating information obtained by a bar code reader 3, the title of the taken out program and the like are stored in a SRAM 9 as collateral data with program reserving data, and contents of the SRAM 9 are displayed by an OSD 10. Thereby, a video tape recorder which displays the program title is obtained.
